

The Swan River Gardens Bulk Product Line-Up

How Much Mulch?

Mulch is usually sold by the cubic yard, and that can leave gardeners scratching their heads when trying to figure out how much to buy. Here is an easy way:

1. First, find out the size of the area you want to cover in square feet. This is easy; just multiply the length of your garden by the width.
2. Next, decide how deep you want your mulch to be, in inches. A couple of inches are usually sufficient.
3. Now multiply the size of your garden in square feet (#1) by the depth of your mulch in inches (#2).

4. Divide the number you get in #3 by 324. This is the number of cubic yards of mulch you will need to cover your garden.
